2. **Translate the following text into Nepali without losing the sense and spirit of the original: (15)**

A civilizational paradigm thus sets forth a relatively simple but not too simple map for understanding what is going on in the world as the twentieth century ends. No paradigm, however, is good for ever. The Cold War model of world politics was useful and relevant for forty years but became obsolete in the late 1980s, and at some point the civilizational paradigm will suffer a similar fate. For the contemporary period, however, it provides a useful guide for distinguishing from what is more important from what is less important. Slightly less than half of the forty-eight ethnic conflicts in the world in early 1993, for example, were between groups from different civilization. The civilizational perspective would lead the UN Secretary-General and the US Secretary of State to concentrate their peacemaking efforts on these conflicts which have much greater potential than others to escalate into broader wars.

Paradigms also generate predictions, and a crucial test of paradigm's validity and usefulness is the extent to which the predictions derived from it turn out to be more accurate than those alternative paradigms. A statist paradigm, for instance, leads John Mearsheimer to predict that "the situation between Ukraine and Russia is ripe for the outbreak of security competition between them. Great powers that share a long and common border, like that between Russia and Ukraine, often lapse into competition driven by security fears. Russia and Ukraine might overcome this dynamic and learn to live together in harmony, but it would be unusual if they do."

3. **Translate the following text into English without losing the sense and spirit of the original:**

उत्तर कोरियाले दक्षिण कोरियासंगको सम्पूर्ण शान्ति भंग भएको घोषणा गर्दै परमाणु आक्रमणको धम्की दिएको छ । चीनले दुवै मुलुक र उसका सहयोगीहरूलाई शान्ति कायम राख्न आग्रह गरेको छ । राष्ट्रसंघीय सुरक्षा परिषद्मा बिहीबार आफूविरुद्ध कडा प्रतिबन्ध पारित भएपछि ऊ थप आक्रोशित देखिएको छ । उत्तर कोरियाले बिहीबार आफूमाथि जाइलाग्ने अमेरिका वा अन्य कुनै राज्यमाथि पारमाणविक निवारक आक्रमण (प्रिडम्पटिभ स्ट्राइक) गर्न सक्ने चेतावनी दिएको थियो

4. Summarize the passage given below in one third of its total length. (15)

Saints should always be judged guilty until they are proved innocent, but the tests that have to be applied to them are not, of course, the same in all cases. In Gandhi's case the questions one feels inclined to ask are: to what extent was Gandhi moved by vanity—by the consciousness of himself as a humble, naked old man, sitting on a praying mat and shaking empires by sheer spiritual power—and to what extent did he compromise his own principles by entering politics, which of their nature are inseparable from coercion and fraud? To give a definite answer one would have to study Gandhi's acts and writing in immense detail, for his whole life was a sort of pilgrimage in which every act was significant. But this partial autobiography, which ends in nineteen-twenties, is strong evidence in his favour, all the more because it covers what he would have called the unregenerate part of his life and reminds one that inside the saint, or near-saint, there was a very shrewd, able person who could, if he had chosen, have been a brilliant success as a lawyer, an administrator or perhaps even a business man.

At about the time when the autobiography first appeared I remember reading its opening chapters in the ill-printed pages of some Indian newspaper. They made a good impression on me, which Gandhi himself at that time did not. The things that one associated with him—home-spun cloth, 'soul forces' and vegetarianism—were unappealing, and his medievalist programme was obviously not viable in a backward, starving, over-populated country. It was also apparent that the British were making use of him, or thought they were making use of him. Strictly speaking, as a Nationalist, he was an enemy, but since in every crisis he would exert himself to prevent violence—which, from the British point of view, meant preventing any effective action whatsoever—he could be regarded as 'our man'. In private this was sometimes cynically admitted. The attitude of the Indian millionaires was similar. Gandhi called upon them to repent, and naturally they preferred him to the Socialists and Communists who, given the chance, would actually have taken their money away. How reliable such calculations are in a long run is doubtful; as Gandhi himself says, 'in the end deceivers deceive only themselves'; but at any rate the gentleness with which he was nearly always handled was due partly to the feeling that he was useful. The British Conservatives only became really angry with him when, as in 1942, he was in effect turning his non-violence against a different conqueror.

But I could see even then that the British officials who spoke of him with a mixture of amusement and disapproval also genuinely liked and admired him, after a fashion. Nobody ever suggested that he was corrupt, or ambitious in any vulgar way, or that anything he did was actuated by fear or malice. In judging a man like Gandhi one seems instinctively to apply high standards so that some of his virtues pass unnoticed. For instance, it is clear from even the autobiography that his natural physical courage was quite outstanding: the manner of his death was a later illustration of this, for a public man who attached any value to his skin would have been more adequately guarded. Again, he seems to have been quite free from the maniacal suspiciousness which E. M. Forster rightly says in *A Passage to India*, is the besetting Indian vice, as hypocrisy is the British vice.

5. Read the following passage carefully and answer the questions given below. 5x3=15

The biggest house of cards, the longest tongue, and of course, the tallest man: these are among the thousands of records logged in the famous *Guinness Book of Records*. Created in 1955 after a debate concerning Europe's fastest game bird, what began as a marketing tool sold to pub landlords to promote Guinness, an Irish drink, became the bestselling copyright title of all time (a category that excludes books such as the Bible and the Koran). In time, the book would sell 120 million copies in over 100 countries— quite a leap from its humble beginnings.

In its early years, the book set its sights on satisfying man's innate curiosity about the natural world around him. Its two principal fact finders, twins Norris and Ross McWhirter, scoured the globe to collect empirical facts. It was their task to find and document aspects of life that can be sensed or observed, things that can be quantified or measured. But not just any things. They were only interested in superlatives: the biggest and the best. It was during this period that some of the hallmark Guinness Records were documented, answering such questions as "What is the brightest star?" and "What is the biggest spider?"

Once aware of the public's thirst for such knowledge, the book's authors began to branch out to cover increasingly obscure, little-known facts. They started documenting human achievements as well. A forerunner for reality television, the Guinness Book gave people a chance to become famous for accomplishing eccentric, often pointless tasks. Records were set in 1955 for consuming 24 raw eggs in 14 minutes and in 1981 for the fastest solving of a Rubik's Cube (which took a mere 38 seconds). In 1979 a man yodeled non-stop for ten and a quarter hours.

In its latest incarnation, the book has found a new home on the internet. No longer restricted to the confines of physical paper, the *Guinness World Records* website contains seemingly innumerable facts concerning such topics as the most powerful combustion engine, or the world's longest train. What is striking, however, is that such facts are found sharing a page with the record of the heaviest train to be pulled with a beard. While there is no denying that each of these facts has its own, individual allure, the latter represents a significant deviation from the education-oriented facts of earlier editions. Perhaps there is useful knowledge to be gleaned regarding the tensile strength of a beard, but this seems to cater to an audience more interested in seeking entertainment than education.

Originating as a simple bar book, the *Guinness Book of Records* has evolved over decades to provide insight into the full spectrum of modern life. And although one may be more likely now to learn about the widest human mouth than the highest number of casualties in a single battle of the Civil War, the *Guinness World Records* website offers a telling glimpse into the future of fact-finding and record-recording.

Questions

- In what ways has *Guinness Book of Records* undergone change over the time since its inception in 1955?
- What is the most significant difference between older editions of the *Guinness Book of Records* and the new *Guinness World Records* website?
- What do you mean by **empirical** and what were the principal fact finders of *Guinness Book of Records* primarily interested in? What makes you call their work empirical?
