

द्वितीय पत्र :-सेवा सम्बन्धी प्राविधिक विषय

पूर्णांक:- १००

1. Introduction

- 1.1 History of livestock development & Veterinary services in Nepal.
- 1.2 Status and prospect of Livestock Industries and Veterinary services in Nepal
- 1.3 Status and prospect of livestock/veterinary business, market and trade in Nepal

2. Animal Health Services:

- 2.1 Emerging Re-Emerging Transboundary animal diseases of livestock and poultry and their threats in livestock and poultry industries
- 2.2 Contingency plan for notifiable disease control
- 2.3 Economically important Infectious diseases of livestock and poultry their epidemiology, prevention, control and eradication strategy
- 2.4 Economically important parasitic diseases of livestock and poultry their epidemiology, prevention, control and eradication
- 2.5 Risk analysis of importation of animals, animal products and biological products of veterinary use
- 2.6 National Veterinary Laboratory Services in Context to National and International Needs
- 2.7 Important Zoonotic diseases
- 2.8 Role and responsibility of public and private sector in Animal health services
- 2.9 System advancement in veterinary pharmaceuticals & biologicals and their status in Nepal
- 2.10 Emergency Preparedness Disease Eradication Approach
- 2.11 Disease Economics
- 2.12 Disease Surveillance System
- 2.13 Early Disease Warning System

3. Livestock Production, Regulation and management

- 3.1 Livestock and poultry production systems, desired level of management practice for commercialization of production
- 3.2 Quarantine Management and its implication in international trade and transit
- 3.3 Slaughter house management and meat inspection technology
- 3.4 Veterinary drug administration
- 3.5 Importance of various standards in livestock industry
- 3.6 Drug residues in Livestock Products and its effect in public health

4. International Standards:

- 4.1 Office International Epizootics(OIE), Sanitary and Phyto- sanitary(SPS) and World Trade Organization(WTO) related Codes, Codex, Standards and their implication in present context of trade and production of livestock and its products

5. **Veterinary Laboratory Services and management of quality control of veterinary drugs and biological**
 - 5.1 Importance of Standardization of diagnostic procedures
 - 5.2 Standardization of Veterinary Vaccines, antigens and anti-sera
 - 5.3 Regularization on import, storage and use of live or attenuated veterinary vaccines and quality control management
 - 5.4 Laboratory Management and implication of Good Management Practice (GMP)
6. **Research, Planning, Monitoring and Evaluation**
 - 6.1 Animal Health research in Nepal
 - 6.2 Project Management, Monitoring and Evaluation
 - 6.3 Concept of project identification, prioritization, and feasibility study.
 - 6.4 Social and Economic Evaluation of Livestock Diseases
